

ENHANCEMENTS TO ONLINE IDENTITY PROTECTION NOW AVAILABLE IN THE NEW RELEASE OF MAXILOCK IDENTITY SAFE

Maxilock Identity Safe's product upgrade adds multi-lingual capabilities, safeguarding some non-English speaking users' online identity.

Melbourne Australia – July 1st 2007 Leading Australian software developer Maxiworks announced today the updated release of its popular online identity protection solution, Maxilock Identity Safe. Designed to meet the ongoing and escalating threats of identity theft and fraud from Malware and other malicious code, Maxilock Identity Safe will protect login, financial and other personal data, from ending up in the wrong person's hands.

Designed to combat the threat of Online Identity Theft, the fastest growing crime globally, Maxilock Identity Safe delivers unprecedented levels of identity security and protection that integrates best practices in software security design without relying on the consistent software patches or database updates.

According to Maxiworks, makers of Maxilock Identity Safe, Managing Director Gerard Mayo said, "initially with only an English version we were limited in growing our business in the major European markets of France and Germany. Now with the new release offering multi-lingual capabilities, French and German users can now safely and confidently go online to access bank, investment and credit card accounts without compromising or having their identity stolen".

Mr Mayo added "This is only the beginning of our Internationalization of Maxilock. Working and collaborating closely with our exclusive Pan European Sales Partner – IP Import further languages will become available in the very near future"

Maxilock Identity Safe sells for in Australia for \$69.95 inc GST and comes with free e-mail support. Maxilock Identity Safe can be purchased online at the www.maxiworks.com or through any of its' local and international distributors, Agents and Sales Partners.

About Maxiworks

Maxiworks was founded in 2000 to offer an innovative range of software products and services for individuals and organizations to improve better control and protect their computing and online experience.

"We have always felt that true innovation in software development requires new ways of assessing the problems as well as coming up with realistic ideas when exploiting potential approaches to solving a particular problem"

Today as a small business enterprise, hallmarks of Maxiworks' software are its ease of use, simple deployment and solid code base. The company has a clear focus on IT security and is consistently developing and working on software that bridges the gap between IT convenience and security

Maxiworks' software portfolio includes a suite of secure desktop, server, certificate and identity management and protection software applications all with optional biometrics/smartcard authentication.
